## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Smith (U.S. Patent No. 5,742,667).

Regarding claim 7, Smith teaches a method of operating a call processing system to handle a call placed to a called telephone number from a caller having a caller telephone number, the method comprising:

receiving call set-up signaling for the call (column 3, lines 61-63);

prior to service discrimination, processing the called telephone number from the call set-up signaling to determine if the called telephone number is toll-free (column 3, lines 63-66);

if the called telephone number is not toll-free, then checking the caller telephone number in a validation table to determine if the call should be allowed (column 4, lines 20-39);

if the call should be allowed based on the validation table, then processing the called telephone number to select a route for the call (column 4, 40-51);

Art Unit: 2642

if the called telephone number is toll-free, then processing the called telephone number to select the route for the call without checking the caller telephone number in the validation table (column 4, lines 1-8);

after selecting the route for the call, generating and transferring a message indicating the route selected for the call (column 4, lines 10-19).

Regarding claim 8, Smith further teaches the method wherein the set-up signaling comprises a SS7 IAM (this is inherent in an Intelligent Network).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 7 and 8 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***
